

Starbooks Brief

Background

Founded in 2023, Starbooks is a pioneering space-age book retailer that has revolutionized the literary world with its state-of-the-art orbiting library. Our mission is to create a unique and captivating reading experience for book enthusiasts around the globe, while inspiring them to explore the uncharted galaxies of literature.

Project Components

Frontend

- A single header module with an eyebrow, title, paragraph text, button, background image, and CSS-animated icon
- Desktop, tablet, and mobile size support

Specific Requirements

Animation

- The scroll indicator icon should be animated with CSS
- Ensure that the animation does not negatively impact page performance

Efficiency

- Use best practices for code structure and maintainability

Deliverables

- An accessible link to your GitHub repository with your Starbooks work
